

Human Edge CORE™

Growth Mindset

This Growth Mindset self-assessment tool provides individuals and organizations the insights to accelerate learning, drive innovation, increase performance, more effectively manage change and lead transformation.

This unique report indicates where an individual falls on the fixed to growth mindset continuum with a focus on three core categories:

With aggregate data, organizations are able to pinpoint strengths and close gaps to accelerate learning and provide leaders the opportunities to more effectively grow their employees

The benefits of growth mindset cultures can be significant with employees:

- Have **47%** higher trust in their company
- Are **34%** more likely to feel a sense of ownership and commitment to the future of their company
- Show **65%** stronger agreement that their company supports risk-taking

Source: 2018 NeuroLeadership Institute

The unique features of this assessment include:

- Give insight into strengths and pinpoint areas where growth is needed
- Practice tips are provided to enable employees to move along the continuum no matter where they started
- Engage employees to perform on their best, accelerate their learning and grow their potential

Applications

- Selection of new talent
- Development of current talent
- Use a tool to drive a cultural change and drive organizational transformation
